

SCIENCE AND HEALTH PROJECTS FOR STUDENTS

The Solar System And Universe

Solar System and Universe Projects summarize information about the Solar System and Milky Way Galaxy. Students learn about Planets, Stars, the Sun, Comets, Meteors, Meteorites, Light Travel, Star Color, Star Magnitude, Black Holes, Galaxies, and Quasars. A Constellation Star Map and Sheet of Constellation Legends are included. Projects are constantly updated to include major new discoveries, including changed status of Pluto. Special sheets included on Pathfinder and Sojourner's mission to Planet Mars, as well as NASA's space mission plans through year 2025. Six new sheets of information on Hubble; Other Space Telescopes; Stars; Other Solar Systems; and Saturn and Cassini Spacecraft exploration have been added.

All Projects are written on a fifth grade reading level. They are appropriate for Grades 5 through 9.

All sets include **35 Student Projects (17" x 22") - Teacher's Guide - Sheets For Duplication - and**
